

Number Plate Mounts

Follow the simple picture instructions below.

Points to note are;

- 1/. Use a sharp 4mm drill bit.
- 2/. Space the mounts equally from the centre line of the front clamshell.
- 3/. The spacing is dependant on the size of your number plate.
- 4/. Once you are satisfied with the fitment stick the Velcro gently on the brackets then push the number plate onto the Velcro as this will enable easy central location.
